DIGITAL AGENCY

3D Unity / Unreal Developer (m/w)
in Hamburg

We are looking for an experienced (2-3 years professional experience) Unity and/or Unreal 3D developer to strengthen our ambitious and dynamic team. We offer you a job in which you can share your fascination and passion for digital experiences together with our team of screen-, motion- and UX designers as well as developers.

We are looking forward to receiving your application with work samples, a salary presentation and a possible entry date.

Required:

Excellent experience in shading, lighting and animation in the game engine Unreal and/or Unity3D.
Experience in animation / motion design
Sound knowledge of linear algebra, performance optimization
Excellent knowledge of C ++ and C #
Experience in the development of in-house tools to increase efficiency
Very good knowledge of German and English spoken and written
Proactive and independent work
Teamwork
Desirable: programming of shaders (Cg / HLSL / GLSL)
Desirable: Experience in developing apps for Android / iOS
Desirable: Experience in Python

Please send us your application documents not by mail, but by mail to: jobs@demodern.de
