

DIGITAL AGENCY

(Senior) Mobile Developer (m/w)

We are looking for a creative native digital to enrich our team in the area of creative coding with focus on mobile apps. You'll be in charge of frontend development of interactive projects, technical research and conception, but foremost pushing interaction, app and web technologies together with a very skilled and passionate team of designers and developers forward.

You'll have the chance to bring in your own ideas and not only develop websites, but interactive experiences of all sorts and integrate into a passionate team, who all share the same goal, creating the best possible experience.

You created medium to advanced mobile apps and websites and played around with different engines.

Requirements

- 3+ years of digital design/development experience
- Excellent understanding of HTML, CSS3, Javascript, Animation Frameworks
- Experience in React-native, Ionic, Vue-js or similar
- Interest in graphic and/or motiondesign
- Skills in writing clean and maintainable code
- Optional but not required: ES6, npm, gulp, webpack, browserify
